DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 11, 12 and 13:

The primary reason for the allowance of claims 1, 11, 12 and 13 is the inclusion of a variable resistor and a resistor connected in series and defining a terminal therebetween for tapping off a partial voltage, an evaluation device connected to a further resistor and generating a control signal dependent upon a value derived from the further resistor and a control logic unit generating, dependent upon the comparison result, a control signal at the output terminal driving the variable resistor. It is these features found in the claim, as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

Claims 2-10 are allowed due to their dependency on claim 1.

Claims 14-17 are allowed due to their dependency on claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following is cited to show the state of the art with respect to calibration configuration methods and devices in general:

U.S. Patent No. 6,737,851 to Roo discloses a calibration circuit including matching resistive elements.

U.S. Patent No. 6,566,904 to van Bavel et al. discloses a pad calibration circuit with on-chip resistor.

U.S. Patent No. 6,388,449 to Ramsden discloses an auto-calibration circuit for eliminating errors due to resistor tolerances.

U.S. Patent No. 6,275,090 to Burger, Jr. et al. discloses an integrated circuit including a self-calibrated resistor.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Teresinski whose telephone number is (571) 272-2235. The examiner can normally be reached on M-F 8:30 - 5:00.
